## URGENT INFORMATION FOR HAYS CISD PARENTS & STUDENTS ABOUT FENTANYL

Counterfeit pills containing fentanyl are in the Hays CISD area. During the summer of 2022, several Hays CISD students have experienced overdoses and tragically some have lost their lives.

 A lethal  
dose of fentanyl!

**ANY pill you get from a friend or buy off of the street could be a counterfeit pill containing fentanyl.**

**Only take medication that was prescribed by a doctor, purchased at a pharmacy, and approved by parents or guardians.**

Counterfeit pills are fake medications that have different ingredients than the actual medication. They may contain no active ingredient, the wrong active ingredient, or have the right ingredient but in an incorrect quantity. Counterfeit pills may contain lethal amounts of fentanyl or methamphetamine and are extremely dangerous because they often appear identical to legitimate prescription pills, and the user is likely unaware of how lethal they can be.

Left: Authentic oxycodone M30 tablets (top) (also known as Percocet) vs. counterfeit oxycodone M30 tablets containing fentanyl (bottom). Center: Authentic Adderall tablets (top) vs. counterfeit Adderall tablets containing methamphetamine (bottom). Right: Authentic Xanax tablets (white) vs. counterfeit Xanax tablets containing fentanyl (yellow).
